

IMPLEMENTATION GUIDELINES FOR ANSI ASC X12 EDI CONVENTIONS

CARRIER

PAYMENT ORDER/REMITTANCE ADVICE (820) TRANSACTION SET

*FCA US
INFORMATION & COMMUNICATION TECHNOLOGY MANAGEMENT*

*ANSI ASC X12
VERSION/RELEASE 003010*

FCA US - Carrier Remittance Advice

820 Payment Order/Remittance Advice

Functional Group ID=RA

Introduction:

This standard provides the format and establishes the data contents of a payment order/remittance advice transaction set. The payment order/remittance advice transaction set can be used for three different purposes: (1) to order a financial institution to make payment to payee(s) on behalf of the sending party, (2) to report the completion of a payment to payee(s) by a financial institution, and (3) to give advice to the payee by the payor on the application of a payment made with the payment order or by some other means. This standard is not designed for exception reporting from the financial institution to either party.

Notes:

The transaction should echo key fields from the freight bill (210 Freight Invoice or paper freight bill).

FCA US will use the 820 Remittance Advice to inform carriers that a check has been processed, and is in the mail. The remittance advice will echo the detail line item information normally contained on the paper remittance advice attached to the check.

FCA US only transmits an 820 Remittance Advice Transaction Set when it recognizes a Carrier's capability to receive EDI transmissions. The 820 is transmitted under the following conditions:

- ***Carrier has EDI capability***
- ***Freight bill data is validated according to the guidelines established by the FCA US service bureau***

FCA US processes freight payments based on the carrier's submission of paper freight bills or 210 Freight Invoice transaction sets.

Letters have been sent to carriers detailing the FCA US guidelines in submitting freight bills.

Notes about the new format of this implementation guide:

1. The requirements contained herein have not changed, with the exception of anything that may appear in the History of Changes section below.
2. The term 'Base Status' refers to the requirements as defined by the ASC X12 Standards Organization.
3. The terms 'User Status' and 'User Attributes' refer to FCA US requirements.
4. Data segment sequence tables for each hierarchical level will no longer be presented at the beginning of each hierarchical level. The data segment sequence tables for each hierarchical level will now be presented at the beginning.
5. Segment Syntax and Semantic notes as defined by ASC X12 will now be included where in the 'old' format they were not.
6. Element Description as defined by ASC X12 will now be included where in the 'old' format they were not.
7. Many comments that relate to a particular code value will now appear underneath the code value description, where previously the comments would appear to the right.

History of Change:

FCA US - Carrier Remittance Advice

Segment: **ST** Transaction Set Header
Position: 010
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Syntax Notes:
Semantic Notes:
Comments: 1 The transaction set identifier (ST01) is intended for use by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).
Business Rules: Variable Name: STST
Notes: *Example:*
ST~820~0001

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
ST01	143	Transaction Set Identifier Code	M ID 3/3	M
		Code uniquely identifying a Transaction Set		
		820 X12.4 Remittance/Payment Advice		
ST02	329	Transaction Set Control Number	M AN 4/9	M
		Identifying control number assigned by the originator for a transaction set.		

FCA US - Carrier Remittance Advice

Segment: **BPS** Beginning Segment for Payment Order/Remittance Advice
Position: 020
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To (1) indicate the beginning of a payment order/remittance advice transaction set and total payment and (2) to enable related transfer of funds and/or information from payor to payee to occur while utilizing an automated clearing house (ACH) or other banking network.

Syntax Notes:

Semantic Notes:

- Comments:**
- 1 BPS02 is the total currency amount of all items being paid in this transaction.
 - 2 When using this transaction set to initiate a payment, BPS04, BPS05, BPS07, BPS09, BPS10, BPS11, and BPS12 may be required, depending upon the conventions issued by the specific banking channel being used. BPS04 and BPS05 relate to the originating depository financial institute (DFI).
 - 3 BPS06 is the account number of the sending company to be debited or credited with payment.
 - 4 BPS09 and BPS10 relate to the receiving DFI.
 - 5 BPS11 is the account number of the receiving company to be debited or credited with the payment.
 - 6 BPS13 is conditional on the ability of the receiving depository financial institution (RDFI) to furnish the actual settlement date, and shall be left blank (omitted) by the originating company.

Notes: *The BPS02 element is the total currency amount of all line item remittances being paid in this transaction.*

Example:

BPS~PBC~1432.83~I

Data Element Summary

Ref.	Data		Base	User

FCA US - Carrier Remittance Advice

Segment:	CUR Currency
Position:	040
Loop:	
Level:	Heading
Usage:	Optional
Max Use:	1
Purpose:	To specify the currency (dollars, pounds, francs, etc.) used in a transaction
Syntax Notes:	1 If CUR08 is present, then CUR07 is required. 2 If CUR09 is present, then CUR07 is required. 3 If CUR11 is present, then CUR10 is required. 4 If CUR12 is present, then CUR10 is required. 5 If CUR14 is present, then CUR13 is required. 6 If CUR15 is present, then CUR13 is required. 7 If CUR17 is present, then CUR16 is required. 8 If CUR18 is present, then CUR16 is required. 9 If CUR20 is present, then CUR19 is required. 10 If CUR21 is present, then CUR19 is required.
Semantic Notes:	
Comments:	1 Monetary values are assumed to be expressed in the currency of the country of the transaction originator unless the optional CUR segment is used to specify a different currency. The CUR segment also permits the transaction originator to indicate a specific exchange rate, foreign exchange location and date/time as the basis for a currency conversion. Example 1. Assuming the currency of the transaction originator is U.S. dollars, the following CUR segment, when used in the heading area of a transaction, would indicate that all monetary values appearing in the transaction are expressed in Canadian Dollars (CAD). (In this example the exchange rate is at the discretion of the receiver). CUR*BY*CAD* N/L Example 2. Assuming the currency of the transaction originator is U.S. dollars, the following CUR segment, when used in the detail area of a transaction, describes a currency conversion for that particular item from U.S. dollars to Canadian dollars. It also indicates that a specific exchange rate, at a specified foreign exchange location on a given date/time be used as the basis for the currency conversion. Notes below the diagram describe the meaning of the element values. CUR*BY*USD*1.20*SE*CAD*NY*007*840821*1400 N/L 1 2 3 4 1. Identifies the buyer's (BY) currency as U.S. dollars (USD). 2. The multiplier (1.20) is the exchange rate factor for the conversion. 3. Identifies the seller's (SE) currency as Canadian dollars (CAD). 4. Indicates the basis for the exchange rate as the New York Foreign Exchange (NY) and the effective date/time (007) as August 21, 1984 (840821) at 2:00 P.M. (1400). The value for this item is to be converted to Canadian dollars (CAD) at the exchange rate of 1.20, based on the New York Foreign Exchange (NY) at 2:00 P.M. (1400) on August 21, 1984. The actual unit price conversion for the item would be: The unit price value 7.50 (U.S. dollars) multiplied by the exchange rate (1.20) equals 9.00 Canadian dollars (7.50 X 1.20 = 9.00) CUR07 through CUR21 provide for five (5) dates/times relating to the currency conversion, i.e., effective date, expiration date, etc.
Notes:	<i>The FCA US Carrier payment process currently uses two currencies, U.S and Canadian. The process will NOT mix currencies on a single check. For a Carrier performing transportation services in both the U.S.A. and Canada, separate</i>

FCA US - Carrier Remittance Advice

checks will be issued.

Examples:

CUR~BY~USD

CUR~BY~CAD

FCA US - Carrier Remittance Advice

Segment: **REF** Reference Numbers
Position: 050
Loop:
Level: Heading
Usage: Mandatory
Max Use: 5
Purpose: To specify identifying numbers.
Syntax Notes: 1 At least one of REF02 or REF03 is required.
Semantic Notes:
Comments:
Notes: *For the issuance of a check, FCA US will generate two REF segments at the heading level. One REF will reference just the check number that is being applied to all of the following detail line items appearing on the Remittance Advice, while the second REF will identify both the check number as well as the paying bank.*

Although the standard allows for up to 30 characters, FCA US stores and returns only 7 characters of the check number when the Reference Number Qualifier equals 'CK'. When the Reference Number Qualifier equals 'DD', FCA US will transmit fourteen (14) characters consisting of a seven (7) position check number as well as a seven (7) position bank number.

Examples:

REF~CK~0357234

REF~DD~03572340007502

Data Element Summary

Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
REF01	128	Reference Number Qualifier	M ID 2/2	M
		Code qualifying the Reference Number.		
		CK <i>Check Number</i>		
		DD <i>Document Identification Code</i>		
REF02	127	Reference Number	C AN 1/30	AN 1/14
		Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.		
		<i>Check number qualified by REF01.</i>		
		<i>Example: 0357234.</i>		
		<i>03572340007502</i>		
REF03	352	Description	C AN 1/80	Not Used

FCA US - Carrier Remittance Advice

Segment: **DTM** Date/Time/Period
Position: 060
Loop:
Level: Heading
Usage: Mandatory
Max Use: 10
Purpose: To specify pertinent dates and times
Syntax Notes: 1 At least one of DTM02 or DTM03 is required.
Semantic Notes:
Comments:
Notes: *FCA US will always use 1 DTM segment in the Heading Area to convey the check paid date appearing on the check*

Example:
DTM~020~901017

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
DTM01	374	Date/Time Qualifier	M ID 3/3	M
		Code specifying type of date or time, or both date and time		
		020 Check

		Date (YYMMDD)		
		Check Paid Date		
DTM03	337	Time	C TM 4/4	Not Used
DTM04	623	Time Code	O ID 2/2	Not Used

FCA US - Carrier Remittance Advice

Segment:	N1 Name
Position:	070
Loop:	N1 Optional
Level:	Heading
Usage:	Optional
Max Use:	1
Purpose:	To identify a party by type of organization, name, and code
Syntax Notes:	1 At least one of N102 or N103 is required. 2 If either N103 or N104 is present, then the other is required.
Semantic Notes:	
Comments:	1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
Notes:	FCA US will use TWO occurrences of the N1 segment. The first occurrence will identify FCA US as the 'payer' of the check, the second N1 segment will identify the 'paying bank' on which the check is drawn. Elements N103 and N104 are conditional, and predicated on the contents of element N101. If element N101 contains 'PR', then elements N103 and N104 are blank. If element N101 contains a 'PB', then elements N103 and N104 contain FCA US assigned codes for the paying bank.

Examples:

N1~PR~FCA US

N1~PB~MORGAN GUARANTY AND TRUST~92~0007502

N1~PB~BANK OF MONTREAL~92~0009384

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
N101	98	Entity Identifier Code	M ID 2/2	M
		Code identifying an organizational entity or a physical location.		
		PB	Paying Bank	
		PR	Payer	
N102	93	Name	C AN 1/35	
		Free-form name		
		FCA US assigned name for payment		
N103	66	Identification Code Qualifier	C ID 1/2	
		Code designating the system/method of code structure used for Identification Code (67)		
		92	Assigned by Buyer or Buyer's Agent	
N104	67	Identification Code	C ID 2/17	ID 2/7
		Code identifying a party.		
		If N101 = 'PB', and CUR02 = 'USD', then N104 = '0007502'.		
		If N101 = 'PB', and CUR02 = 'CAD', then N104 = '0009384'		

FCA US - Carrier Remittance Advice

Segment: **N2** Additional Name Information
Position: 080
Loop: N1 Optional
Level: Heading
Usage: Optional
Max Use: 2
Purpose: To specify additional names or those longer than 35 characters in length
Syntax Notes:
Semantic Notes:
Comments:
Notes: *FCA US will use N2 segments to support the identification of additional name information pertaining to organization specified in the N1 segment.*

Examples:

N2~LOGISTICS OFFICE

N2~TRANSPORTATION SERVICES

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
N201	93	Name	M AN 1/35	M
		Free-form name		
		<i>FCA US use: As needed</i>		
N202	93	Name	O AN 1/35	
		Free-form name		
		<i>FCA US use: As needed</i>		

FCA US - Carrier Remittance Advice

Segment: **PER** Administrative Communications Contact
Position: 120
Loop: N1 Optional
Level: Heading
Usage: Optional
Max Use: 3
Purpose: To identify a person or office to whom administrative communications should be directed

Syntax Notes: 1 If PER03 is present, then PER04 is required.

Semantic Notes:

Comments:

Notes: *FCA US will use one PER segment at the heading level to identify Logistics personnel who have payment authority and responsibility. A name and telephone number will be provided. A PER segment will only be provided for the N1 loop pertaining to the FCA US location.*

Examples:

PER~IC~JOHN DOE~TE~2485121111

PER~IC~JANE DOE~TE~2485122222

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
PER01	366	Contact Function Code	M ID 2/2	M
		Code identifying the major duty or responsibility of the person or group named		
		<i>IC</i>	<i>Information Contact</i>	
PER02	93	Name	O AN 1/35	
		Free-form name		
		<i>Information Contact with payment responsibility</i>		
PER03	365	Communication Number Qualifier	O ID 2/2	
		Code identifying the type of communication number		
		<i>TE</i>	<i>Telephone</i>	
PER04	364	Communication Number	C AN 7/21	AN 7/10
		Complete communications number including country or area code when applicable		
		<i>Contact telephone number</i>		

FCA US - Carrier Remittance Advice

Segment:	LS Loop Header
Position:	010
Loop:	
Level:	Detail
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate that the next segment begins a loop
Syntax Notes:	
Semantic Notes:	
Comments:	1 LS is a control segment. LS is always used in conjunction with a corresponding loop trailer (end) - LE, as illustrated below. The LS and LE indicate the start and end of a loop but are not part of the iteration of the loop. LOOP NESTING Loop "A" Header (LS "A") Loop "B" Header (LS "B") Loop "C" Header (LS "C") Loop "C" Trailer (LE "C") Loop "D" Header (LS "D") Loop "D" Trailer (LE "D") Loop "B" Trailer (LE "B") Loop "A" Trailer (LE "A") Neither LS nor LE is used if the data within the loop is not used.
Notes:	<i>The LS segment is a control segment. It is always used in conjunction with a corresponding loop trailer (end) segment - LE. The LS and LE segments indicate the start and end of a loop, but are not part of the iteration of the loop.</i>
	<i>Example:</i>
	<i>LS~1</i>

Data Element Summary

Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
LS01	447	Loop Identifier Code	M ID 1/4	M
Code identifying a loop within the transaction set which is bounded by the related LS and LE segments (corresponding LS and LE segments must have the same value for loop identifier). (Note: The loop ID number given on the transaction set diagram is recommended as the value for this data element in segments LS and LE.)				
<i>'1' for the initial LS segment. Maximum use is 1 for each transaction set</i>				

FCA US - Carrier Remittance Advice

Segment: **N1** Name
Position: 020
Loop: N1 Mandatory
Level: Detail
Usage: Mandatory
Max Use: 1
Purpose: To identify a party by type of organization, name, and code
Syntax Notes: 1 At least one of N102 or N103 is required.
2 If either N103 or N104 is present, then the other is required.
Semantic Notes:
Comments: 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
Notes: *FCA US will use as many 'N1' segments as necessary in the LS/LE loop to identify both the origin supplier as well as the destination receiving location. The first N1 segment within a loop will always identify the 'RC' receiving location, while the following 'N1' segments will identify 'SF' shipping origins until another 'N1' segment containing an 'RC' is encountered.*

Examples:

N1~RC~STERLING HEIGHTS ASSEMBLY~92~04025
N1~SF~HOLLEY AUTOMOTIVE DIVISION~92~46435 C
N1~RC~JEFFERSON NORTH ASSEMBLY~92~04012
N1~SF~MODERN TOOL & DIE COMPANY~92~63769 F

Data Element Summary

Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
N101	98	Entity Identifier Code	M ID 2/2	M
		Code identifying an organizational entity or a physical location.		
		<i>RC Receiving Location</i>		
		<i>SF Ship From</i>		
N102	93	Name	C AN 1/35	
		Free-form name		
		<i>FCA US assigned plant or supplier name</i>		
N103	66	Identification Code Qualifier	C ID 1/2	
		Code designating the system/method of code structure used for Identification Code (67)		
		<i>92 Assigned by Buyer or Buyer's Agent</i>		
N104	67	Identification Code	C ID 2/17	
		Code identifying a party.		
		<i>If N101 = 'RC', the FCA US assigned receiving location code;</i>		
		<i>If N101 = 'SF', the FCA US assigned supplier location code</i>		

FCA US - Carrier Remittance Advice

Segment: **RMT** Remittance Advice
Position: 030
Loop: RMT Optional
Level: Detail
Usage: Optional
Max Use: 1
Purpose: To indicate the detail on items
Syntax Notes:
Semantic Notes:
Comments:

- 1 Parties using this segment should agree on the content of RMT01 and RMT02 prior to initiating transaction communication.
- 2 RMT03 may also be used to specify the amount paid when different from the amount invoiced.
- 3 RMT08 is any amount being deducted from or added to a particular invoice or line item for reasons other than payment discount (e.g., damaged goods, short shipment, tax, penalty or late charge payment).

Notes: *The RMT01 and RMT02 will qualify the primary Reference Qualifier and Number as the Bill of Lading Number. Other secondary references such as conveyance, trailer, or freight bill numbers will be specified in the REF segments.*

The RMT03 specifies a paid amount for a detail specific shipment. The sum of all amounts in the RMT03 segment must equal the total check amount specified in the heading BPS02 amount element. If the RMT03 element is zero (0), the detail line item amount has been rejected or denied for payment, and the Adjustment Reason Code (RMT09) will contain a code indicating the reason. The RMT08 element will specify the actual denied or rejected amount.

FCA US will use the Description element (RMT10) to indicate that the detail remittance line is the result of the ASN process, submitted freight bills, or adjustment process.

Examples:

RMT~BM~5375643~1211.45~~~~~~ASN
RMT~BM~27364~0~~~~~~524.37~19~FREIGHT BILL

NOTE: EXAMPLE 2 AND THE EXAMPLES AT THE END OF THE 820 TRANSACTION SET ILLUSTRATE A ZERO (0) IN ELEMENT RMT03. THIS IS FOR READABILITY PURPOSES ONLY. SINCE THE ELEMENT RMT03 IS OPTIONAL, MOST TRANSLATORS WILL REPLACE THE ELEMENT WITH THE DESIGNATED ELEMENT SEPARATOR

RMT~BM~27364~~~~~~524.37~19~FREIGHT BILL

		52	Credit for Previous Overpayment	
		53	Remittance for Previous Underpayment	
RMT10	352	Description	O AN 1/80	
		A free-form description to clarify the related data elements and their content		
		Remittance Description/Code:		
		'ASN'		
		'Balance Due'		
		'Cancellation'		
		'Debit Memo'		
		'Freight Bill'		
		'Voluntary Refund'		

FCA US - Carrier Remittance Advice

Segment:	REF Reference Numbers
Position:	050
Loop:	RMT Optional
Level:	Detail
Usage:	Optional
Max Use:	15
Purpose:	To specify identifying numbers.
Syntax Notes:	1 At least one of REF02 or REF03 is required.
Semantic Notes:	
Comments:	
Notes:	<i>Provides reference numbers for the carrier to trace payments to a particular shipment or shipments. The primary Bill of Lading reference will be provided in the RMT segment.</i> <i>Additional REF segments within a loop may provide:</i> - Carrier's Conveyance Number (Trailer No.) - Carrier Invoice Number (if available) - Carrier Purchase Order Number (CPO-ID Code) - Check Number of a previous remittance if denied <i>Although the standard allows for up to 30 characters, FCA US stores and returns only the first 16 characters of the supplier's Bill of Lading Number from the original ASN (856).</i> <i>For Conveyance Codes or Trailer Numbers, FCA US will return the first 10 characters that are available. Carrier Purchase Order Numbers will contain up to 9 characters.</i> <i>Examples:</i> <i>REF~CN~364537283</i> <i>REF~EQ~374820</i> <i>REF~PO~422025</i>

Data Element Summary				
Ref.	Data	Name	Base	User
<u>Des.</u>	<u>Element</u>		<u>Attributes</u>	<u>Attributes</u>
REF01	128	Reference Number Qualifier	M ID 2/2	M
		Code qualifying the Reference Number.		
		CK	Check Number	
			Used only if RMT03 equal zero.	
		CN	Carrier's Reference Number (PRO/Invoice)	
		EQ	Equipment Number	
		PO	Purchase Order Number	
REF02	127	Reference Number	C AN 1/30	AN 1/16
		Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

FCA US - Carrier Remittance Advice

Segment: **DTM** Date/Time/Period
Position: 060
Loop: RMT Optional
Level: Detail
Usage: Optional
Max Use: 10
Purpose: To specify pertinent dates and times
Syntax Notes: 1 At least one of DTM02 or DTM03 is required.
Semantic Notes:
Comments:
Notes: *FCA US will use the DTM segment in the Detail Area to support each RMT and REF segment. When the RMT segment RMT01 element 'Reference Qualifier' indicates 'BM', the DTM segment date will be a 'bill of lading' date. If the REF segment REF01 qualifier specifies a 'CN', the DTM segment date will be a freight bill date. If the REF segment REF01 element defines a 'EQ', the DTM segment will specify a trailer arrival date. If the REF segment REF01 element contains a 'PO', then the following DTM segment will contain the contract's expiration date.*

If the RMT segment RMT03 contains a 0 (zero) amount indicating that a remittance line item is denied, then the REF segment will contain a 'CK' to indicate the check number on which the remittance line item was paid, and the DTM segment will specify the date on which the check that check was issued.

NOTE: The current Remittance Advice check paid date is always shown in the DTM segment at the heading level.

Examples:

DTM~011~901017

DTM~036~901017

DTM~022~900222

Data Element Summary				
Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>

FCA US - Carrier Remittance Advice

Segment:	LE Loop Trailer
Position:	070
Loop:	
Level:	Detail
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate that the loop immediately preceding this segment is complete
Syntax Notes:	
Semantic Notes:	
Comments:	1 LE is a control segment. LE is always used in conjunction with a corresponding loop header (start) - LS, as illustrated below. The LS and LE indicate the start and end of a loop but are not part of the iteration of the loop. LOOP NESTING Loop "A" Header (LS "A") Loop "B" Header (LS "B") Loop "C" Header (LS "C") Loop "C" Trailer (LE "C") Loop "D" Header (LS "D") Loop "D" Trailer (LE "D") Loop "B" Trailer (LE "B") Loop "A" Trailer (LE "A") Neither LS nor LE is used if the data within the loop is not used.
Notes:	<i>The LE segment is a control segment. It is always used in conjunction with a corresponding loop header (start) segment - LS. The LS and LE segments indicate the start and end of a loop, but are not part of the iteration of the loop.</i>
	<i>Example:</i>
	<i>LE~1</i>

Data Element Summary

Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
LE01	447	Loop Identifier Code	M ID 1/4	M
Code identifying a loop within the transaction set which is bounded by the related LS and LE segments (corresponding LS and LE segments must have the same value for loop identifier). (Note: The loop ID number given on the transaction set diagram is recommended as the value for this data element in segments LS and LE.)				

FCA US - Carrier Remittance Advice

Segment: **SE** Transaction Set Trailer
Position: 010
Loop:
Level: Summary
Usage: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Syntax Notes:

Semantic Notes:

Comments: 1 SE is the last segment of each transaction set.

Notes: *Example:*
SE~51~0001

Data Element Summary

Ref.	Data		Base	User
<u>Des.</u>	<u>Element</u>	<u>Name</u>	<u>Attributes</u>	<u>Attributes</u>
SE01	96	Number of Included Segments	M N0 1/6	M
		Total number of segments included in a transaction set including ST and SE segments		
SE02	329	Transaction Set Control Number	M AN 4/9	M
		Identifying control number assigned by the originator for a transaction set.
